

The SDM Supported Housing Module sits alongside and interfaces seamlessly with the standard Rents & Housing Management and Waiting List & Allocation Modules.

The Supported Housing Module also allows users to Record Support Needs for supported housing tenancies.

## Key Information

- Set up User defined Assessment and Support Needs Questionnaires
- Supported Housing Extended Database
- Provides ability to report Support Housing Details
- Linked to the SDM Household Members screen
- Capturing Key tenant data and support needs

## Main Features

- Record Initial Assessment & Support Needs
- Make Risk Assessments on a periodic basis
- Add and maintain Support Plans
- Add periodic Keyworker Sessions Recording progress and Actions Taken
- Provides Outcome Reporting
- Provides prompts and reminders when Keyworker sessions or Risk Assessments are due

## Integration

The SDM Supported Housing Module integrates with Rents & Housing Management and Waiting List & Allocations Household Members screen within the tenant and Applicant databases.
